Subject: glyphosate

Thanks for quick download.

Fyi, I was curious to see what Monsanto was saying. They have a page (you don't see it if you Google "Roundup", but if you google "glyphosate cancer" you do.)

Two interesting aspects re risk communication and battles for public opinion.

- (1) They list experts. (The include "Dr Oz" as one of them!) <http://www.monsanto.com/iarc-roundup/pages/third-party-responses-iarc.aspx>
- (2) There is one site that I can't tell, but it might be a nonpartisan nonprofit. I don't know if it gets used much by science journalists or not. [I'll include Lou given he might be interested.] It is British, so perhaps looked at more by UK journalists than US? I see it does have quotes from Alan Boobis and Dan Coggin. The group is the "Science Media Centre". <http://www.sciencemediacentre.org/expert-reaction-to-carcinogenicity-classification-of-five-pesticides-by-the-international-agency-for-research-on-cancer-iarc/>
